## BEGONIA

**Sleeping Beauty** (Fibrous Rooted, F<sub>1</sub> Hybrid). With this new variety, a bit darker than Rosy Red, the family of the Thousand Wonders (Tausendschoen) Begonias has got a new member. It will be a worthy comrade to his kin, who are the leading Begonias in the European markets. Originators imported seed.

**Thousand Wonders Pink** (Tausendschoen), centifolium rose.

**Rosy Red**, striking color.

**Sleeping Beauty**, darker sister of Rosy Red.

**Thousand Wonders Red** (Rote Tausendschoen), deep red. **Gold Medal Hamburg 1953**.

Tr. Pkt. ....\$1.50

**Home** (Tuberous Rooted Multiflora, F<sub>1</sub> Hybrid). These Tuberous Begonias do not produce a few giant flowers but are covered with medium sized, radiant blooms. As they are carried well above the foliage, this mass of color is strikingly beautiful and brilliant. They like shadow but can withstand the heat better than other Begonias. The seed is very fine and extreme care is necessary to keep just the right amount of moisture during the first time after sowing. The bulbs can be used again for several years and increase in size. The blooms of Home are salmon-orange and reach a size of 2½ inch.

Tr. Pkt. .... \$2.00

The big, feathery flowers are rich cutflowers.

## PETUNIA

**Large Plain Edged Popcorn.** An earlier dwarf and compact growing counterpart to Snowstorm; many will prefer it to this old favorite. An excellent variety for pots and bedding.

Tr. Pkt..\$1.50 1/64 oz..\$3.30 1/32 oz..\$6.00

**Large Fringed Flame.** A true scarlet with a slight suggestion of orange in the flare of the bloom which tends to deepen a bit in the throat. An extremely rich and luminous color. **Little Giants Pink Frills.** A nicely ruffled dwarf type developed from the popular Little Giants. Early blooming, medium size flowers in brilliant rose-pink shades are profusely borne on compact well rounded plants. Excellent for pot work, borders and bedding.

## STREPTOCARPUS

### WIESMOOR HYBRIDS

Our 1953 introduction of this outstanding novelty earned much praise from the trade. We are glad to say that many of our customers ordered the seed and are confident they will do so again every year. We recommend every florist who has not yet tried it to do so now. Excellent for pots and cut flowers this newcomer on the American market will soon establish his firm position.

## SALVIA

**Fireworks.** This new variety is developed from St. Johns Fire, which was one of the most important improvements in the history

of the early dwarf Salvia strains. All the plants of Fireworks come into flower much on the same date, extra early. They start to flower when 3 to 4 inches in height while in the flats, providing an extra sales appeal. There is no finer bedding type of Salvia obtainable.

Tr. Pkt..\$1.25 1/4 oz...\$3.50 Oz...\$11.50

## IPOMOEA

**Climbing Scarlett O'Hara.** Deep wine red, this development corrects the one fault of the original Gold Medal Winner, it climbs vigorously without outside help, like Heavenly Blue. Otherwise the new climber is in every way identical with the well loved Scarlett O'Hara Morning Glory.

Tr. Pkt....30c 1/4 oz....50c Oz....\$1.60

## STOCKS

**Giant Column Pacific Pink and White.** Pacific Pink is a distinct new color break, the first true pink Stock ever developed. A cream base with a touch of salmon distinguishes this Stock from all other pink strains. It must be seen to be fully appreciated. Pacific White is a big step in the direction of a universal all purpose white Column Stock for both greenhouse and outdoor use. It is vigorous, early blooming, bears large flat florets with strong stems and has no branching tendency.

## FOR BETTER ASTERS

In addition to using the best wilt resistant strains:

Set your plants in soil which has not had a crop of Asters on it recently or sterilize the soil.

Put your outside plantings in a cloth house to prevent leaf hoppers from bringing in Aster Yellows.

Avoid checking plant growth. Grow your seedlings in plant bands to prevent root injury in transplanting. See page 79.

### Unexcelled for spring forcing and outdoor culture

The spring-flowering types give a much heavier crop of longer stemmed flowers than the standard early-flowering types but come into bloom a little later. Seed should not be sown before October in the greenhouse for flowering during March, April and early May. Sown early outdoors they are superior to, and come into flower earlier than, the standard summer flowering varieties.

# A. B. C. LAWN SEED MAKES Beautiful Lawns

★ There is no substitute for quality in grass seed. Into the A. B. C. Mixtures are blended the finest available heavy weight seed—seeds of hardy perennial grasses that produce a deep-rooted permanent turf of real beauty.

Each year more florists and landscape gardeners sow our mixtures for best results. Despite the unstable, high prices of fine grasses, our formula has remained the same year after year except that we are now omitting clover as explained below.

## A. B. C. SUNNY MIXTURE

Heavy weight Kentucky Blue Grass and Fancy Red Top blended with other fine grasses make this mixture outstanding.

150 pounds to one acre.	

Many of our customers prefer mixtures without clover therefore we no longer include it in our mixtures. For those desiring clover we offer the finest grade of White Dutch Clover separately below.

Better results and more even distribution can be obtained by sowing clover separately. Use 4 ounces to every pound of grass seed sown.

#### **DORMANT ROOTS, 3 to 5 Eyes**

Our Canna roots are strong, healthy, true Northern Grown. The varieties listed below have proven indispensable where large exhibition showings are needed. Early ordering is suggested, because of the great demand this year.

**City of Portland.** Deep pink. Green foliage 3½ feet. Extra good flower. Does not fade.

**Copper Giant.** Green foliage about 3½ feet tall and a very vigorous grower with large clear pink flowers.

**Dorothy S.** A new dwarf continuous flowering clear salmon red Canna. Produces large flowers and grows about 4 feet tall. Very vigorous and drought resistant.

**Hungaria.** 3½ feet. LaFrance pink.

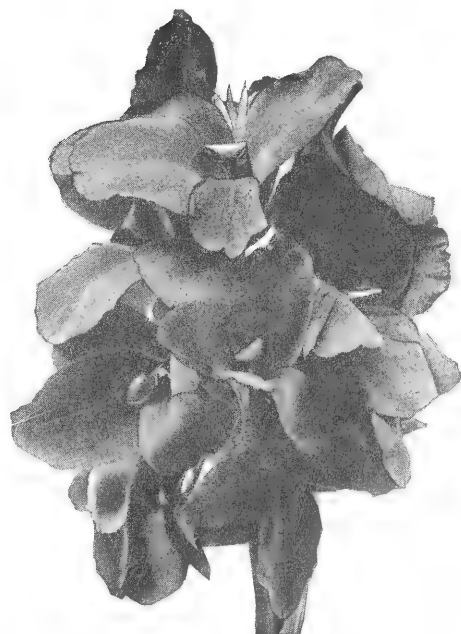

**King Humbert.** This remarkable Gold Medal Canna has been the sensation of the past ten years and is the greatest favorite today. Handsome, broad, tropical foliage. Scarlet flowers; bronze leaves, 4 feet.

**The President.** 4 feet. This immense new flaming scarlet has come into wider use more quickly than any other Canna. The President leads the red varieties in the quality and also the quantity of its bloom. The foliage is rich green and burn-proof in the hottest weather.

**Rosemond Cole.** Green foliage grows about 3 feet tall has a large Variegated red and orange flower and is a vigorous grower.

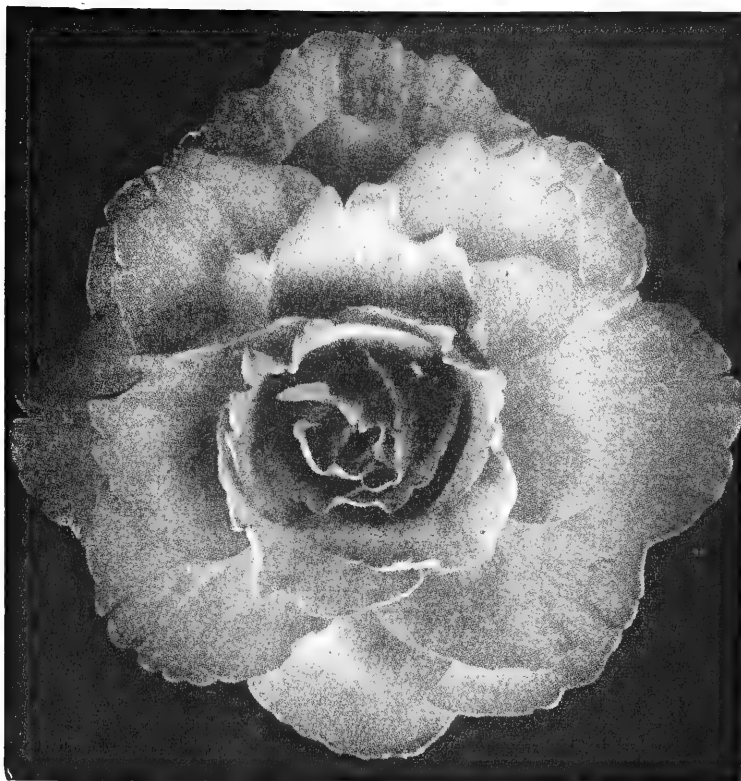

**Yellow King Humbert.** 4 feet. An orchid-flowering sport of the well-known King Humbert. Flower a deep, rich yellow, softly spotted and blotched with bright red. Some plants occasionally give a scarlet or scarlet striped flower, which we consider an improvement rather than a detriment. Green foliage.

### GLOXINIA CULTURE

Gloxinias are fit companions for the tuberous rooted Begonias and the fancy leaved Caladiums. Their richly colored flowers are most outstanding. Start the tubers in 4-inch pots in a mixture of leaf mold, sand and a little well-rotted cow manure with good bottom heat. Keep shaded and as the leaves appear, be careful with the watering. You cannot do it with the hose, so make use of the old-fashioned way, the watering can, and go over each plant carefully, examine every one and don't apply water unless it is needed, on the other hand, they suffer every bit as much if they don't get water when ready for it, for they want a moist soil. Keep the leaves dry. It doesn't hurt to get them moist on a hot day early in the morning, but they soon go if you wet them every time you water the plants. They want a little shade most of all, but if you overdo it you may obtain foliage but no flowers.

## Tuberous Rooted Begonias

### Large Flowering Type

With its bright colors, richness of foliage and easy culture it has become a favorite with the public in gardens and homes.

**CULTIVATION.** The Begonia prefers partial shade and not too warm a place where they will give best results specially in wet summers. For cultivation in greenhouses, shade is necessary.

Forcing can be started in February, March or April, depending on the time they should be in flower. The bulbs are placed in boxes, on light porous soil close together, and then covered with earth to a depth of one inch above the bulb. The earth should be kept just moist, too much water will rot the bulbs.

When the plants begin to develop place them in pots.

## **LET'S KEEP TRANSPORTATION COSTS DOWN**

During the past few years there have been substantial increases in parcel post, express, truck and railroad freight costs. On small packages parcel post is cheapest, but there are new limits on the size and weight (see page 96). Express is fast and efficient, but expensive. The truck lines now have a minimum charge based on 200 lbs. at the first class rate, and to this they have added an additional service charge of \$1.50 on all shipments under 5,000 lbs.

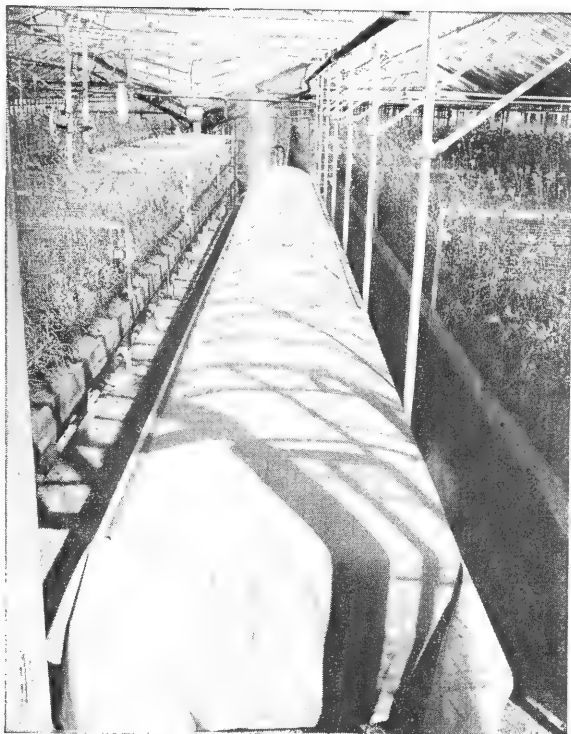

The only economical means of shipment at this time is by railroad freight, but these shipments may require three to six weeks for de-

livery. We, therefore, respectfully suggest that you estimate your requirements well in advance and send us your orders in ample time for shipment by railroad freight, so specifying on your order.

### **Supplies Are Shipped from Chicago**

All items of supplies listed in the A.F.S. Bluebook section of this catalog are shipped from Chicago unless a different F.O.B. point is shown. Our eastern customers are urged to send their orders for supplies direct to Chicago rather than to our New York sales office in order to save time and insure prompt shipment.

## A.F.S. SPECIAL HEAVY PLASTIC STERILIZING CLOTH

After years of experimenting we have found a heavy plastic material that makes the best sterilizing blanket so far. Strong (heavy 12 gauge), yet flexible.

Accidental tears or punctures can be easily repaired by placing a piece cut off the end over the hole with a piece of cloth over and under the patch, and then applying a hot iron for 5 seconds.

Makes a tight joint at bench edges. Light (15 oz. a sq. yd.) and easy to handle. Transparent.

Available in any length or width, but pieces 6 ft. or 8 ft. wide are the most popular. Price, F.O.B. Philadelphia, Per sq. yd. **\$2.25**

Send for free sample.

### FUMI-COVERS

Made of Firestone Velon, a lightweight pure vinyl plastic film of 3 gauge. Used as a gas-tight cover with chemical soil fumigants or steam.

## CLOTH FOR SHADING AND CLOTH HOUSES

### LONG LIFE SARAN CLOTH HOUSE

SARAN, the new material for cloth houses is fast making the old cotton cloths obsolete. SARAN is a plastic screening made by Dow Chemical Co. and will outlast copper screening, giving 10 years service. Non-inflammable and impervious to water. Air circulates freely through its fine mesh with 68% light filtration.

Our SARAN houses are sewn with orlon thread which is guaranteed

for the life of the cloth. SARAN does away with all storm dangers—no more rips or tears from rain and wind.

Based on a made up cost of 46½¢ per square yard, a SARAN Cloth House will cost you approximately 5½¢ per square yard per year; this means SARAN is the lowest cost cloth house on the market today.

SARAN is available in green color only.

A little more cloth than the actual measurements of the frame, as additional material is needed for rolling around the wires and for slight variations in fitting the cloth to the frame when sewing.

The new chemical soil conditioner which, if applied to problem soils such as "hard clay" will change the mechanical structure to a loose, crumbly consistency. Treated soil readily absorbs and retains moisture, is better aerated. Roots more easily penetrate the loose soil, and fertilizer is made more readily available to plants.

Kriliun can be used to advantage in greenhouse benches, in potting soil, outside beds and in building or rebuilding lawns.

## SOLUBLE FERTILIZERS FOR LIQUID FEEDING

KAPCO was the first to take soluble fertilizers out of the fancy-priced class and offer growers not one, but several analyses of solubles, highly concentrated for making "liquid fertilizers." KAPCO has been tested, approved, and used by several experiment stations and is used by large growers, golf courses, and nurserymen all over the United States.

Advantages of liquid feeding:

1. Frequent light feedings are not as shocking as in dry feeding.
2. Less salt formation.
3. Feeds and waters in one operation, saving time and labor.
4. Uniform feeding results in uniform plant growth.
5. Less fertilizer is required, thus effecting a savings.

2. Large selection, thus adjusting the plant food to the crop.
3. 99½% soluble, not merely ground fine.
4. KAPCO phosphates are drug-pure and are 100% soluble and available.
5. Trace elements added in an available form.
6. Color tracer shows when you are feeding.

## GLASS SUBSTITUTES

These are excellent substitutes for glass and can be used in many ways by the florist: For greenhouse partitions, hot bed covers, covering outside beds, etc.

All the materials must pass durability tests. ## BIRD Plant Bands

### Vita-Band D

Contains root growth until grower chooses to let root through Band. Only quick, slight pressure is needed to crack Band. Do not remove Vita-Band D when transplanting. Band disintegrates in the soil permitting free growth of roots from time of transplant. Nutrient-treated with quickly available plant food.

### Vita-Band 10

For short growing periods. Will usually contain root growth up to approximately 8 to 10 weeks. Nutrient-treated with quickly available plant food . . . your judgment determines need for additional feeding. Vita-Band 10 is identical to Vita-Band D except Vita-Band 10 is removed at time of transplant. Vita-Band D is not.

### Vita-Band H

The new nutrient-treated successor that replaces Bird Vita-Band 40. Vita-Band H will control root growth of those plants which demand extra-long growing periods.

# 1954 A.F.S. BLUEBOOK

## The Complete Guide to All Horticultural Supplies

### IMPORTANT

#### MINIMUM ORDER CHARGE

Because of the high cost of labor and packing materials, it is necessary for us to make a **SERVICE CHARGE** of \$1.00 on all orders under \$5.00. Please include in your orders some additional items to make your order a minimum of \$5.00 and avoid the extra service charge.

Also be sure to include sufficient postage for small shipments.

#### SUPPLIES ARE SHIPPED FROM CHICAGO

All items of florist supplies listed in the A.F.S. Bluebook section of this catalog are shipped from Chicago unless a different f.o.b. point is shown.

Our eastern customers are urged to send their orders for supplies direct to Chicago rather than to our New York sales office in order to save time.

### TERMS OF BUSINESS

**Routing:** Please give explicit shipping directions with each order, giving name of Freight, Express and Post Office stations. If no directions are given we will use our best judgment, but all goods travel at purchaser's risk.

**Parcel Post:** We will be pleased to send such items as can be mailed by Parcel Post; customers to remit for postage. We do not deliver any goods free at Wholesale Prices.

**Disclaimer:** The American Bulb Company and the American Florist Supply Company give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds (bulbs or plants) or florist supplies it sells.

All goods are offered subject to crop failures, shortages or other causes beyond our control and to being unsold on receipt of order.

If the customer does not accept the goods on above terms he must return them at once, and money will be refunded or proper credit given. We exercise, however, the greatest care to fill our orders with the highest quality possible, as it is our constant aim to give our customers fullest satisfaction.

**Cash Discounts:** Cash with order only. 2% on Florist Supplies, except on Shading Cloth and Cloth Houses which are NET.

Otherwise, on bills for Florist Supplies, except Shading Cloth and Cloth Houses, a discount of 2% for payment 10 days from date of bill may be deducted. Exception to the above is taken when goods are supplied under special quotation, in which case particular terms will be noted.

Unknown correspondents desiring to open an account will please furnish three references to parties in the trade with whom they have had credit relations, and sufficient time to investigate same; otherwise cash must accompany order.

Goods desired C. O. D. must be accompanied by a partial remittance to guarantee acceptance. We cannot arrange to send perishable stock or goods made to order C.O.D.

**Prices:** This list cancels all previous offers. We reserve the right to advance prices without notice.

**Foreign Shipments:** Orders from customers in foreign countries are quite expensive to handle because of extra packing and preparation of numerous custom forms, etc. For that reason we must add an additional **handling charge of 10%** of the price of the merchandise on all orders from foreign countries with the exception of Canada. Please be sure to include this in your payment.

If your order is written in a foreign language or if the custom regulations of your country require us to furnish invoices or other forms in a foreign language, please include \$5.00 to cover our cost of translating.

Cash must accompany order or an irrevocable letter of credit offered or the name of a local bank on whom you will accept a sight draft given. If you desire shipment by parcel post, be sure to include sufficient postage with your order.

Compliance with these conditions is necessary to insure prompt shipment.
